FAQ - 98

How is my data kept private?

[+]

Your emails never leave your local device unless you explicitly opt-in to cloud features. The core extraction engine runs locally in your browser using compiled WebAssembly models.

Can I disconnect Gmail later?

[+]

Does it work offline?

[+]

Is my data used for training?

[+]

Can this help with career/placement info?

F.A.Q.

Before you connect your inbox.

Can Academic OS read my private emails?

[-]

No. We use local first processing. Our engine only scans for academic keywords (assignment, syllabus, deadline) and extracts metadata. Your personal correspondence never leaves your device.

Is this allowed by my university?

[+]

What happens if it misses a deadline?

[+]

Does it work with Outlook or Canvas?

"Summarize DBMS emails"

"Draft reply to Prof. Smith"

Coordinator Agent Initialized

AWAITING INPUT...

Summarize my DBMS emails from this morning.

COORDINATOR_AGENT >

You received 3 emails related to DBMS (Database Management Systems) this morning:

▪ Assignment 3 Update: Prof. Lee extended the deadline for the SQL Injection lab to Friday at 11:59 PM.

[Source Trace]

▪ TA Office Hours: The TA moved today's office hours to Zoom instead of the lab room.

[Source Trace]

Thanks. Add a task to review the SQL injection notes tomorrow.
